

ANUSH HAMBARYAN

Full-stack software engineer focused on AI-powered products and intelligent automation. Experienced in building end-to-end solutions that help organizations solve complex business problems and create lasting value.

EXPERIENCE

[BluIP Inc.](#) (Yerevan, Armenia)

A Tier 1, cloud communications global service provider with 60,000+ customers.

Software developer **10/2021 - 08/2025**

- Developed performant user interfaces for three data-intensive applications.
- Designed and built a reporting platform that enabled customers to continuously monitor conversational AI solution performance and usage.
- Implemented unit and integration tests with up to 95%+ code coverage.
- Built automation flows, APIs, and contributed to the development and optimization of microservices with third-party integrations.
- Implemented authentication and authorization solutions using Azure Active Directory (Azure AD) and WorkOS.
- Conducted technical research and evaluated solutions to ensure maintainability, strong user experience, and timely delivery.
- Worked closely with stakeholders to define requirements and deliver frontend solutions for a telecommunications ordering and billing platform, providing ongoing production support.

[AIKODA LLC](#) (Yerevan, Armenia)

A startup providing workflow automation solutions for the healthcare industry in the US

Frontend developer **04/2021 - 09/2021**

- Built user-facing functionality for a complex healthcare data collection and management system with 100+ components.
- Communicated with international partners to gather and clarify requirements.

PROJECTS

[Bellis](#)

AI Language Learning Assistant

- Built and deployed an AI-powered language learning platform that generates personalized explanations and flashcards.
- Designed and implemented a RAG-based workflow that connects new learning content to a user's existing knowledge, improving personalization.
- Conducted experiments across models to optimize quality, latency, and cost.
- Implemented production evaluation pipelines using LLM-as-a-Judge techniques and user feedback, enabling continuous improvement.

Tech Stack: LangGraph, LangChain, OpenAI API, Langfuse, TypeScript, Next.js, ChromaDB, MongoDB, Clerk, Tailwind CSS.

SKILLS

AI Systems

- LangGraph
- LangChain
- Langfuse
- OpenAI API
- Dialogflow CX

Application Development

- TypeScript
- Node.js
- Python
- React
- Redux
- Next.js
- Angular
- Material UI
- Tailwind CSS

Data, Cloud & Automation

- SQL
- BigQuery
- Pub/Sub
- ChromaDB
- MongoDB
- Azure
- GCP
- MS Power Platform
- Make

EDUCATION

Harvard Kennedy School

Master's in Public Policy

Cambridge, MA, USA

09/2018 - 05/2020

European University

BA in International Relations

Yerevan, Armenia

09/2010 - 05/2014
