

ANUSH HAMBARYAN

A full-stack developer ready to contribute to end-to-end development processes.
Passionate about orchestrating impactful technical solutions that deliver value.

EXPERIENCE

[BluIP Inc.](#) (Yerevan, Armenia)

A Tier 1, cloud communications global service provider with 60,000+ customers.

Software developer

10/2021 - 08/2025

- Developed performant user interfaces for three data-intensive applications.
- Designed and built a reporting platform that enabled customers to continuously monitor conversational AI solution performance and usage, helping them optimize resource allocation and make data-driven decisions.
- Implemented unit and integration tests with up to 95%+ code coverage.
- Built automation flows, APIs and contributed to the development of microservices with third party integrations.
- Implemented authentication and authorization solutions using Azure Active Directory (Azure AD) and WorkOS.
- Conducted thorough research to identify and evaluate technical solutions, ensuring that the chosen solutions effectively addressed the project requirements while considering factors such as efficient development timelines, long-term maintainability, scalability, and an optimal user experience.
- Actively participated in gathering requirements, facilitating effective communication among team members, and delivering front-end features for a telecommunications services ordering and billing platform.
 - Provided ongoing production support to ensure the stability and functionality of the platform.
- Collaborated with a cross-functional team of 14 members, including back-end developers, DevOps and QA engineers, and the product team.

[AIKODA LLC](#) (Yerevan, Armenia)

A startup providing workflow automation solutions for the healthcare industry in the US

Front-end developer

04/2021 - 09/2021

- Built user-facing functionality for a complex healthcare data collection and management system with 100+ components.
- Communicated with international partners to gather and clarify requirements.
